

Special models

Sometimes an exceptional piece of wood gets into my hands. When that happens, I often decide to build some special models.

That is how our special ukuleles come into being - with a top or body made of maple, pear, bubinga, spruce, jacaranda, cherry, mahogany, moor oak, walnut, ovankol, rosewood, zebra wood or cedar.

If you are looking for a distinctive instrument, browse our online shop for a Brüko special model.

Custom made instruments

Most steps of making our ukuleles require manual craft work. Therefore we can offer you the chance to get your custom made Brüko ukulele.

Your dream ukulele could have features like these:

- choice of woods
- choice of tuners
- wooden binding
 - flat body
 - arched back (Soprano body only)
- longneck (Soprano body, concert neck, 15 frets)
 - bridge with plastic saddle

If you're intending to order a custom made instrument, please contact us!

Making musical instruments since 1890...

There are more than 100 years of experience in every Brüko ukulele. The tradition of our family company began in 1890, when master luthier Alois Kollitz started producing violins and working up tone woods in Rothau (Sudetenland). In the 1930s his sons, the brothers Franz and Josef Kollitz, added the production of banjos and ukuleles.

After WWII the company was built up again in Eltersdorf near Erlangen. Since then, thousands of ukuleles bear the brand name "Brüko" (for "Brüder Kollitz" = "Kollitz brothers").

Instruments like our model No. 6 have become classics with a distinctive design.

Our company moved to Kitzingen in 1990. We only use selected solid tone woods. All steps of production - from cutting, bending, sanding right up to the finishing - are made within our company! For many decades, Brüko has been

making not only soprano instruments, but also concert, tenor and baritone ukuleles.

Besides from ukuleles, our product spectrum includes octave guitars made with the same quality standards as our ukuleles. We also produce premium sound posts for stringed instruments out of carefully selected spruce.

In many European countries and beyond, Brüko ukuleles are instruments of distinguished reputation.

Our instruments

Wood is wonderful material. Build a ukulele from it - and it will not only look lovely, but also sound great! Have a look at the most important advantages of Brüko ukuleles:

- we solely use solid tone woods
- all steps of production done in our house
- accurate workmanship
- perfect intonation
- very good price-performance ratio
- great stability of value

Have you already noticed our "flat" models? Half body height - but double pleasure! Some of our soprano ukuleles have an arched back. That looks good and gives the instrument a great sound!
